

Advanced Voice and Data Services For Property Managers

Are you a property manager looking to provide greater value to your business tenants?

With the largest fiber network in northern New England, FairPoint Communications offers a portfolio of advanced voice and data solutions to meet the needs of property managers, including:

- **Ethernet Direct Internet Access (EDIA)** – 1 Gbps and beyond
- **Managed Wireless LAN** – a scalable, cost-efficient cloud-managed WiFi solution that supports gigabit bandwidth requirements.
- **Hosted PBX** – an advanced cloud-based Voice over IP service that eliminates the need for an on-premises PBX.

Benefits

With FairPoint Communications as your exclusive service provider, you can assert more control over the value-added technology services you provide – helping you attract and retain business tenants. As your tenants move in, you can simply “turn on” services, monetize them, and include them as part of the monthly bill. And, with FairPoint as your service provider, you’ll have a single, reliable point of contact, eliminating the need for you and your tenants to deal with multiple vendors.

Packages

Property managers can choose the combination of advanced communications services that meets their needs – and the needs of their business tenants. Packages include:

PACKAGE 1		Ethernet Direct Internet Access (EDIA)
PACKAGE 2		EDIA + Hosted PBX
PACKAGE 3		Managed Wireless LAN (stand-alone)

Hosted PBX is a cost-effective option for many property management offices. If you maintain an on-property management office, ask us how you can add Hosted PBX to your solutions package.

Call us or visit www.business.fairpoint.com to request a free technology evaluation.

Why FairPoint?

Superior network

FairPoint is proud to bring you the largest network in Northern New England, with over 17,000 fiber route miles and coverage of over 95% of businesses in Maine, New Hampshire and Vermont.
