

Hosted PBX for Medical Professionals

Always on-call

Better health outcomes are linked to better communication between patients and healthcare providers. If a doctor can respond to a patient's needs in real-time, patients are more likely to trust their physicians and comply with medical care and counseling.

Hosted PBX technology allows doctors and other medical care providers to be available to patients and handle busy schedules with innovative tools and features delivered over a private network Ethernet connection.

Hosted PBX: The solution for professionals on-the-go

Whether you're a small, medium or large health organization, FairPoint Communications can offer you a powerful feature-rich phone system without the cost or hassle of having your own on-site, system installed.

FairPoint's Hosted PBX service delivers the power of a PBX over our private, secure Ethernet connection, leaving the maintenance, upgrades and maintenance to experts, so you can focus on your business. FairPoint's Hosted PBX provides:

- **Future-proof technology and flexibility**
 - Our highly- flexible, scalable infrastructure can grow as your business grows
 - Since your PBX is virtualized in the cloud, you can bolt on new services quickly and easily
 - Bring mobility to your communications through web-based call control tools, PC softclients, and mobile phone and table applications
- **End-to-end reliability**
 - Leverage local support and 24/7 management
 - Highly reliable and robust communications network, owned and maintained by FairPoint
 - Re-route calls to an alternate number in the instance of a power outage
- **Easy management**
 - Move or change a user's communications profile with the click of a mouse
 - Enable and disable features remotely
 - Tailor calling features to individuals or group

Top features for medical professionals:

Web-based call management –

Simultaneously ring your business phone and your mobile phone so that you are always within reach of your patients and colleagues.

Accession mobile –

Use your mobile device data plan as an extension of your business line, allowing you to return calls to patients without disclosing your mobile number saving on roaming charges and avoiding block cell services in hospitals.

CommPortal Communicator –

Install a soft phone client on your PC or laptop to clone your business line functionality and increase accessibility.

At FairPoint Communications, we don't just sell products and services — we listen, learn and help you develop the kinds of solutions you'd create yourself if you had decades of telecom expertise and enough time to focus on optimizing your telecom plan. Whatever your communications need, we can help.
