Hosted PBX: Keeping up with Technology

The cloud is the limit

Cloud technology continues to provide new opportunities and solutions for business and industry. Particularly within telecommunications, cloud technology is proving to be beneficial for businesses that don't have adequate financial or human resources to replace or support existing infrastructure, but are looking to take advantage of emerging technologies.

Is that your company? Are you considering your options for advanced telephony and data integration? Do you want to keep your business on the cutting edge? Hosted PBX may be the answer.

Gaining the edge has never been simpler
On-premises equipment and solutions have become increasingly complex in recent years and FairPoint's Hosted PBX service can simplify the process of keeping up with technological advancements. With Hosted PBX, your business will receive a range of capabilities, including enterprise-class unified communications features such as automatic call forwarding, integrated voicemail and email, and Web-portal control of your communications. Also your company can easily integrate other business applications like SIP trunking, VoIP calling plans and Ethernet Dedicated Internet Access.

Other ways FairPoint's Hosted PBX keeps your organization up-to-date:
- No hardware for your company to maintain or upgrade
- Upgrades to the software are provided as a part of the service
- Since your PBX is virtualized on our nework, adding features to existing service is easy and very cost-effective
- You only pay for what you use, so you can be flexible and maximize resources where it makes the most sense for your business
- Inherent diaster recovery functionality helps ensure business continuity. Business continuity is cruicial to maintaining your customer base and ensuring you don't miss any new opportunities.

Advanced features offered today

- Find-Me, Follow-Me
- Selective Call Forwarding
- Auto attendant
- Call Jump
- SimRing

All delivered over a cutting edge, best in class, highly reliable softswitch network platform and a widely distributed highly meshed proven robust data network platform.

We keep up with technology so you can focus on managing and growing your business.

Answer to the call of cutting-edge company

Leveraging technology can set your company apart and propel your business forward. To gain the edge, you need to be in the position to benefit from new innovation as it becomes available. With Hosted PBX provided through FairPoint Communications, you don't have to worry about missing out on the latest technologies in voice and data integration. We are constantly upgrading our network platforms and exploring service enhancements and feature offerings. We can provide upgrades to our customers quickly and seamlessly to keep them ahead of the curve. Ready to learn more about becoming a Hosted PBX customer?

At FairPoint Communications, we don't just sell products and services — we listen, learn and help you develop the kinds of solutions you'd create yourself if you had decades of telecom expertise and enough time to focus on optimizing your telecom plan. Whatever your communications need, we can help.
